NOTES

1. Flood Zone 2 and Flood Zone 3 are taken from the Environment Agency's Flood Map for Planning. This Environment Agency Flood Zone data defines the extent of flooding from rivers and the sea without considering the presence of flood defences. The reason for this approach is to make an allowance for the residual flood risk in the event of a failure or breach/overlapping of the flood defences. This approach raises the awareness of flood risk in defended areas and helps to ensure that this is not discounted as part of development, but is managed appropriately.

2. Flood Zone 3b is defined using modelled extents for the 5% AEP fluvial event where modelled data was available.
